Tera Miller, LRD, Project Coordinator  
Re: Food safety kits

Thank you for your continued interest and involvement in improving food handling among North Dakota youth with the “Teens Serving Food Safely” curriculum. The “Teens Serving Food Safely” project has been a great success with over 6,000 North Dakota students participating.

Once again we offered 25 free food safety kits (valued at \$8.00 each) as a bonus for your students this year. Each kit includes a food thermometer, refrigerator thermometer, magnet and brochures. We ask those who received kits to return their pre, post and follow-up tests to us. These food safety kits were assembled with a generous donation from the North Dakota Beef Commission, USDA and the North Dakota Nutrition Council.

**If you have not sent us your pre, post and follow-up tests from last school year, don't worry, there is still time. Please send any tests from last school year to us as soon as possible.**

If you would still like to order kits for this school year, please email Tera with your name, county, email, phone number, address and number of kits you need. Also, if you are not familiar with the “Teens Serving Food Safely” curriculum, and are interested in obtaining a copy or more information, contact Tera or Julie.

Thank you for your time. If you have any questions, please contact either of us:
